

# 2017 Texas Life Science Forum

## Presenting Companies

### **7 Hills Pharma**

Houston, Texas

[www.7hillspharma.com](http://www.7hillspharma.com)

7 Hills Pharma LLC is an Immuno-Oncology (IO) company developing novel small molecules to improve the effectiveness of IO therapeutics such as checkpoint inhibitors and CAR-T cells.

### **Agilvax**

Albuquerque, NM

[www.agilvax.com](http://www.agilvax.com)

Agilvax discovers and develops targeted cancer immunotherapies and vaccines with its proprietary virus-like particle (VLP) platform technology.

### **Allevant Medical**

Houston, Texas

[www.allevantmedical.com](http://www.allevantmedical.com)

Allevant Medical is developing a minimally-invasive device to treat congestive heart failure.

### **Allotrope Medical**

Houston, Texas

[www.allotropemed.com](http://www.allotropemed.com)

Allotrope provides innovative surgical solutions that improve patient outcomes by reducing procedure time and injury risk.

### **Altoida**

San Diego, Californin and Lucerne, Switzerland

[www.altoida.com](http://www.altoida.com)

With Altoida Neuro Motor Index, we have developed a methodology that allows early screening of AD more accurately and ahead of today's cognitive based methods.

# 2017 Texas Life Science Forum

## Presenting Companies

### **Atrapos Therapeutics**

Houston, Texas

<http://fannininnovation.com/pipeline/atrapos-2>

Atrapos Therapeutics, LLC is an early stage biomedical startup developing first-in-class immunomodulatory therapeutics for the treatment of chronic respiratory illnesses and other indications.

### **AuroRad**

Houston, Texas

AuroRad is developing products that increase the effectiveness of standard radiation therapy in cancer using a patent-pending technology developed at UT MD Anderson Cancer Center.

### **Aviara Pharmaceuticals**

Houston, Texas

[www.aviarapharma.com](http://www.aviarapharma.com)

Research and Development of small molecule therapeutics.

### **BEMY Cosmetics**

Houston, Texas

[www.bemycosmetics.com](http://www.bemycosmetics.com)

BEMY Cosmetics utilizes modified messenger RNA (mmRNA) technology to reprogram aged human skin cells into rejuvenated youthful human cell extracts for cosmetic and dermatological applications.

### **Beta Cat Pharmaceuticals**

Houston, Texas

<http://betacatpharma.com>

Beta Cat is at the forefront of oncology-based Wnt inhibitor development and anticipates being first to market or first to strike an M&A deal off of lead compound Tegavivint's safe and selective mechanism, around which strong IP exists.

# 2017 Texas Life Science Forum

## Presenting Companies

**Cible**  
Houston, Texas

Cible develops a novel platform of well tolerated, MRI-detectable cancer therapeutics that target drug-sensitive and drug-resistant solid tumors.

**Cord Blood Plus**  
Galveston, Texas

Cord Blood Plus discovered a method for unlimited production of cord blood stem, hematopoietic progenitors, and mature blood cells.

**CorInnova**  
Houston, Texas

CorInnova is developing a soft robotic, non-blood contacting cardiac assist device for patients with end stage heart failure.

**Courier Therapeutics**  
Houston, Texas  
[www.couriertherapeutics.com](http://www.couriertherapeutics.com)

Courier Therapeutics provides targeted activation of cancer-killing immune cells.

**Curtana Pharmaceuticals**  
Austin, Texas  
[www.curtanapharma.com](http://www.curtanapharma.com)

Preclinical stage company developing highly target small molecule therapeutics for the treatment of brain cancer.

# 2017 Texas Life Science Forum Presenting Companies

## **CycloSam Therapeutics**

Angleton, Texas  
[www.cyclosam.com](http://www.cyclosam.com)

CycloSam Therapeutics has developed an exceptionally safe and effective bone seeking radiopharmaceutical as a first-line therapeutic for 3 indications for use: Bone Cancer; Bone Metastases; Bone Marrow Ablation.

## **DermaClip US**

Houston, Texas  
[www.DermaClipUS.com](http://www.DermaClipUS.com)

Manufacture and sell DermaCLIP® skin closure device, an innovative wound closure device that is quick, easy and effective.

## **DiaStem**

Houston, Texas  
[www.diastemllc.com](http://www.diastemllc.com)

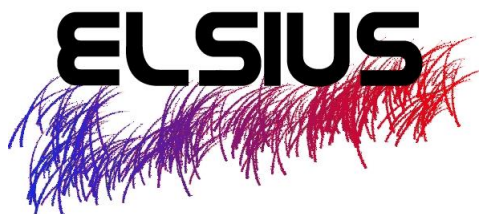

DiaStem LLC has been formed to obtain approval in the USA for a Type 1 Diabetes treatment currently approved outside the USA.

## **DNATRIX**

Houston, Texas  
[www.dnatrix.com](http://www.dnatrix.com)

DNATRIX is developing oncolytic virus immunotherapies for cancer.

## **Elsius Biomedical**

Calgary, Alberta  
[www.elsius.com](http://www.elsius.com)

Elsius Biomedical is developing an ECMO portable device.

# 2017 Texas Life Science Forum

## Presenting Companies

### **EnduRx Pharmaceuticals**

San Diego, California

EnduRx Pharmaceuticals is leveraging proprietary IP licensed from the laboratory of Erkki Ruoslahti, MD, PhD to develop a first-in-class nanosystem.

### **ENTVantage Diagnostics**

Austin, Texas

[www.entv-dx.com](http://www.entv-dx.com)

ENTVantage Dx is a diagnostic device company providing physicians with information on the underlying cause of ear, nose and throat illnesses with point-of-care tests to help providers improve patient care and reduce unnecessary antibiotic prescriptions.

### **Esperance Pharmaceuticals**

Houston, Texas

[www.esperancepharma.com](http://www.esperancepharma.com)

Esperance Pharmaceuticals Inc., based in Houston, Texas, is a clinical stage company developing novel targeted membrane-disrupting peptides and antibodies to treat cancer.

### **FAR Biotech**

Houston, Texas

[www.farbiotech.com](http://www.farbiotech.com)

FAR Biotech has developed a technology for machine learning drug discovery.

### **Forest Devices**

Pittsburgh, Pennsylvania

[www.forestdevices.com](http://www.forestdevices.com)

Forest Devices is developing AlphaStroke, the first stroke screening device that can be used by all medical personnel in any environment.

# 2017 Texas Life Science Forum

## Presenting Companies

### **Formation Biologics**

Austin, Texas

[www.formationbiologics.com](http://www.formationbiologics.com)

Formation Biologics is developing treatment of cancer with immunotherapies and immunoconjugates.

### **Galen Data**

Houston, Texas

[www.galendata.com](http://www.galendata.com)

Galen Data makes it easy for medical device companies to connect their devices to an FDA/HIPAA compliant cloud.

### **HealthTech Solutions (HTS)**

Iowa City, Iowa

HealthTech Solutions is Health-IT SaaS c-corporation, initially serving Organ Transplant Centers and Organ Procurement Organizations, that has developed a secure mobile messaging and workflow app that simplifies clinician-to-clinician communication.

### **Immatics**

Tuebingen, Germany and Houston, Texas

[www.immatics.com](http://www.immatics.com)

Immatics is a clinical-stage biopharmaceutical company active in the discovery and development of T-cell redirecting immunotherapies for the treatment of cancer.

### **Ion Biotechnology (USA)**

Houston, Texas

[www.ionbiotech.com](http://www.ionbiotech.com)

Our company has a platform technology of metallopharmaceuticals which show promise in oncology.

# 2017 Texas Life Science Forum

## Presenting Companies

### **iShoe**

Houston, Texas

[www.ishoebalance.com](http://www.ishoebalance.com)

iShoe quantifies balance and fall risk, which can keep patients safer in the hospital and safer in the community.

### **KnightHawk ETEC**

Houston, Texas

[www.knighthawketec.com](http://www.knighthawketec.com)

KnightHawk ETEC offers a new process technology to convert medical wastes into clean syngas at low cost.

### **Lighthill Medical**

Mesa, Arizona

[www.telluridemedicalpartners.com](http://www.telluridemedicalpartners.com)

Lighthill Medical, Inc. is developing a family of catheters for the delivery of oncology agents for image-guided, minimally invasive interventional procedures.

### **MedeStat**

Houston, Texas

[www.medestat.com](http://www.medestat.com)

MedeStat's solutions allow rapid patient information access under any conditions anywhere in the world without Internet access.

### **Mirata BioPharma**

Spring, Texas

[www.miratabiopharma.com](http://www.miratabiopharma.com)

Mirata Biopharma is an immuno-oncology biotechnology company developing a breakthrough Granzyme B (GrB) fusion protein platform that utilizes the body's natural defense mechanisms directed specifically against cancer cells.

# 2017 Texas Life Science Forum

## Presenting Companies

### **Molecular LogiX**

Houston, Texas

<http://molecularlogix.com>

Molecular LogiX provides new anti-cancer drug leads to fill the Biotech/Pharma Development Pipeline.

### **Moogene Medi**

Boston, Massachusetts

[www.moogene.com](http://www.moogene.com)

Moogene Medi develops lipid nanoparticle - CRISPR Cas9 therapies for genetic indications such as mutant KRAS resistant colorectal cancer, male baldness, and type 2 diabetes.

### **Multisensor Diagnostics**

Pikesville, Maryland

[www.multisensordiagnosics.com](http://www.multisensordiagnosics.com)

Multisensor Diagnostics' MouthLab device performs rapid medical assessment of multiple vital signs and real-time triage in less than a minute.

### **NanoMedical Systems**

Austin, Texas

[www.nanomedsys.com](http://www.nanomedsys.com)

NanoMedical has developed miniaturized, implantable drug delivery devices based on nanofluidic membranes that achieve constant drug release over many months.

### **NEONEURON**

San Antonio, Texas

[www.neoneuron.org](http://www.neoneuron.org)

NeoNeruon brings regenerative medicine to patients with unmet medical need such as Parkinson's disease and stroke.

# 2017 Texas Life Science Forum

## Presenting Companies

### **Noleus Technologies**

Sugarland, Texas

[www.noleustechnologies.com](http://www.noleustechnologies.com)

Noleus is developing a medical device which enables faster patient recovery and decreases length of stay following abdominal surgery, saving physicians time and hospitals money.

### **Original Biomedical Implants**

Richardson, Texas

[www.originalbiomedicalimplants.com](http://www.originalbiomedicalimplants.com)

Original Biomedical Implants develops and markets new medical devices/implants with superior low cost biocompatible ultrananocrystalline diamond coating.

### **Pheramor**

Houston, Texas

[www.pheramor.com](http://www.pheramor.com)

Pheramor is enhancing romance and saving lives through genetics and technology.

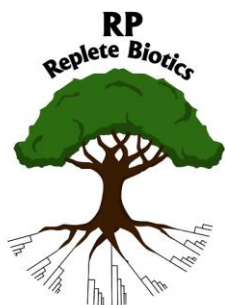

**RAPAMYCIN**  
HOLDINGS™

### **Rapamycin Holdings**

San Antonio, Texas

<http://rapamycinholdings.com>

Rapamycin Holdings is commercializing eRapa, a novel and proprietary reformulation of the drug rapamycin, for the prevention of cancer progression and/or recurrence in early stage prostate cancer.

### **Replete Biotics**

Houston, Texas

<http://repletebiotics.com>

At Replete Biotics, we provide novel medical devices that offer standardized, efficient, and sanitary means to collect and process microbiome samples for diagnostic or therapeutic interventions.

# 2017 Texas Life Science Forum

## Presenting Companies

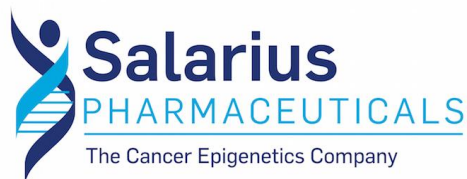

### **RevaTis AM**

College Station, Texas

[www.revatis.com](http://www.revatis.com)

RevaTis AM proposes a global concept in regenerative veterinary medicine that has the potential to revolutionize how stem cell therapy is conducted within the equine industry.

### **Salarius Pharmaceuticals**

Houston, Texas

<http://salariuspharma.com>

Salarius Pharmaceuticals is developing novel epigenetic therapies for the treatment of genetically well-defined cancers with a high unmet need.

### **Sanarus Technologies**

Pleasanton, California

[www.sanarus.com](http://www.sanarus.com)

Sanarus has a technology that freezes and immediately kills early stage breast cancer in under 30 minutes in a doctor's office.

### **Saranas**

Houston, Texas

<http://saranas.com>

Saranas is a medical device company focused on improving patient outcomes through early detection of internal bleeding complications.

### **SegueTx-Pancreatic Cancer**

Shreveport, Louisiana

[www.seguetx.com](http://www.seguetx.com)

SegueTx-Pancreatic Cancer (STXPC) discovers and develops repurposed drugs to treat pancreatic cancer and pulmonary fibrosis.

# 2017 Texas Life Science Forum

## Presenting Companies

### **Siva Therapeutics**

Austin, Texas

[www.sivatherapeutics.com](http://www.sivatherapeutics.com)

Siva Therapeutics is developing Targeted Hyperthermia™, a safe, minimally invasive adjunct cancer therapy, which creates therapeutic heat within solid tumors.

### **Sonavex**

Baltimore, Maryland

[www.sonavex.com](http://www.sonavex.com)

Sonavex enables nurses to detect post-operative blood clots with ultrasound.

### **StemMed**

Houston, Texas

[www.stemmedcancer.com](http://www.stemmedcancer.com)

StemMed is developing safe and effective drugs that target STAT3 to treat cancer and chronic inflammatory diseases.

### **The Immortality Institute**

Houston, Texas

[www.theimmortalityinstitute.com](http://www.theimmortalityinstitute.com)

The Immortality Institute intends to reverse chronic medical illnesses and study, to make happen, human biological Immortality.

### **Theratome Bio**

Indianapolis, Indiana

Theratome Bio is developing an innovative, injectable biologic derived from the secretome of adult stem cells for ischemic brain injury and stroke.

# 2017 Texas Life Science Forum Presenting Companies

## **Vax-Immune**

Houston, Texas

[www.vaximmune.com](http://www.vaximmune.com)

Vax-Immune's LabReady® is a unique platform technology that improves infection detection by moving the laboratory to the patient.

## **Vitls**

Houston, Texas

[www.vitlsinc.com](http://www.vitlsinc.com)

We help healthcare providers to detect deterioration in hospital patients earlier with the help of wearable technology.
